Navilock Laptop Security Cable with 3 lockheads for Kensington, Noble Wedge and Nano slot

Description

This laptop security lock by Navilock enables to lock different devices e.g. laptop, projector, monitor etc. at any place. The steel cable with its 2 m and key lock can be tied easily around objects like chairs, table-leg or anything similar and thus the device will be saved against theft.

Exchangeable lockheads
The special feature of this security cable are the three included lockheads. They can be changed by simply plugging them on and are exchangeable as required. The three most common lock variants Kensington slot (3 x 7 mm), Noble Wedge slot (3.2 x 4.5 mm) and Nano slot (2.5 x 6 mm) can be secured with this security cable. Because of the small design of the lock, this security cable is ideal for slim netbooks.

Locking up without a key
Due to the special mechanism of the laptop lock, it is possible to lock up without a key. The appropriate key is only needed for unlocking.
