Bright

Deep cleanses the skin with high frequency vibrations or pulsations

Removes dirt and makeup, unclogs pores and gently exfoliates the skin

Are you dreaming of blemish-free, radiant-looking skin? Meet Silk'n Bright! This skin-loving, silicone facial cleansing brush is all you need to deeply cleanse and massage your skin. It removes dirt and makeup residue in seconds, unclogs pores and gently exfoliates. The skin's blood circulation gets improved, which results in a healthy-looking, peachy glow. Try it out and you'll never want to cleanse and massage your skin with anything else again!

Why Silk'n Bright:

- Deep cleanses and massages the skin with high frequency vibrations or pulsations
- Removes dirt and makeup, unclogs pores and gently exfoliates the skin
- Improves blood circulation for a radiant-looking appearance
- Helps promote the absorption of skin care products
- Suitable for all skin types
- 5x more effective than manual cleansing

- Up to 8,000 vibrations per minute
- 7 speed settings
- 30 seconds interval timer
- 2 minutes auto shut-off timer
- Rechargeable, up to 60 uses on one full charge
- Includes USB cable and USB wall adapter

Why Silk'n Bright?

Silk'n Bright has long and soft silicone studs which have great benefits! Dirt, pollution, oil and makeup residue get lifted away from your skin, making it clean and refreshed. From day one, you'll notice a huge change in the softness and complexion of your skin. Also, the silicone itself is very soft, making it a great option for all skin types. Even sensitive skin will benefit from it. Furthermore, skin care products will be absorbed by the skin more easily due to the absence of impurities.

Ultra-hygienic and a money safer!

Unlike standard facial cleansing brushes, this silicone brush resists the build-up of bacteria, ensuring an ultra-hygienic cleansing routine day in, day out. Silk'n Bright also saves you money as there is no need to purchase refill brush heads ever again. A Bright along with your favourite face wash is all you need to get the job done!

Double-sided: Cleansing and massage

Silk'n Bright has two sides. The front contains silicone studs for deep cleansing purposes. The thinner studs provide a gentle cleansing and the thicker studs are suitable for more precise cleansing, specially meant for hard to reach areas like around the nose, eyes and chin. The back is provided with silicone ridges to undo your skin from stress by giving it a titillating, relaxing massage. Additionally, you can also use it with your favourite serum or day/night cream to help them penetrate deeper into the skin with the high frequency vibrations, making them work more effectively.

Vibrating and pulsating modes with 7 speed settings

The technical magic behind Silk'n Bright? The high frequency vibrating and pulsating modes that can be used in 7 different speed settings, reaching up to 8,000 vibrations per minute! For mild but powerful cleansing.

Ready in just 2 minutes

The clever interval timer notifies you every 30 minutes, so you are aware of the time that has past. The device shuts off automatically after 2 minutes, letting you know when you are finished. This way it ensures that you don't cleanse the skin for too long.

Waterproof

Many facial brushes on the market are not fully waterproof and can possibly only be used in the shower. Silk'n Bright is completely waterproof, so no water can get through. It can be easily used both under the shower and in the bath. You can combine your daily facial cleansing routine easily with the rest of your body, so you'll be ready even quicker!
