# Delock USB 2.0 Switch 4 PC to 1 device

## Description

This USB switch by Delock allows to share a single USB 2.0 peripheral device with four different computer systems. This avoids the cost of purchasing multiple peripherals or the hassle of swapping cables from one system to another.

**Memory function**
Port selection works via a button, regardless if one of the computer systems is disconnected. The last setting is saved, even if the unit is shut down and restarted.

**Secure mounting**
A built-in magnet allows the switch to be attached to suitable metal surfaces; alternatively, the case has an option for wall mounting with screws.

## Specification

- Connectors:
  Input:
  4 x USB 2.0 Type-B female
  Output:
