35 PRODUCT INDEX

38 BioLite In Retail

39 Point-of-Purchase Displays

BioLite creates advanced energy products that cook, charge, and light your life off the grid. We develop technologies that turn fire into electricity, share power across devices, and pack unprecedented lumens in your pocket. Every purchase of a BioLite product creates lasting change for communities living in energy poverty and helps us fulfill the promise of **energy everywhere**.

Energy On A Mission

Half the planet lives in energy poverty, lacking safe, affordable, and reliable ways to cook, charge, and light their lives. Three billion people still cook over smoky open fires for their meals every day.

That's why we developed the HomeStove, a large-format biomass stove that cuts fuel consumption in half and reduces smoke by 90%, all while producing electricity to charge mobile phones and LED lights.

Parallel Innovation:
How Your Purchase Creates Impact

At BioLite we research and develop core technologies that transform access to energy in both outdoor and emerging markets. When outdoor customers purchase a BioLite product, those sales are reinvested into building the teams, channels, and programs to solve complex challenges and ultimately bring energy everywhere.

Turning Fire Into Electricity with Thermoelectrics

Light up a **fire** to cook your meals. We capture some of the waste heat via a copper probe. We **convert that heat into usable energy** via a thermoelectric generator. Electricity flows to a USB port so you can charge devices while simultaneously powering an internal fan. That fan blows air into the flames to improve combustion. Translation: **a smokeless wood fire plus off-grid power for your gear**.

Cook

Firing Up The Cooking Aisle

With the introduction of the CampStove in 2012, BioLite reignited the stove category; by combining renewable fuels with breakthrough combustion technology, we made cooking over wood approachable and portable, giving outdoor enthusiasts a compelling alternative to gas stoves while tapping into the power and pull of a traditional campfire. Five years later, hundreds of thousands of passionate customers all over the world are powering their off-grid adventures with the CampStove, unlocking their energy potential using nothing but the sticks around them.

BioLite CampStove 2

The stove that started it all gets even better.

More power. New interface. The same magic.

SPRING 2017

IMPROVED

On-Demand Electricity

Updated thermoelectrics provide 50% more power

NEW

On-Board Storage

Integrated 2600 mAh battery can store a full phone charge

NEW

Smart LED Dashboard

Control 4 fan speeds and get real time feedback on fire strength and power supply

Burn Wood Like Gas

Burn wood including found sticks or BioLite BioFuel pellets

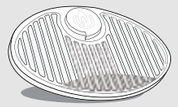

Smokeless Flames

Enjoy a campfire feel with a fire that burns like gas

CampStove 2 Accessories

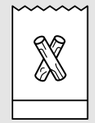

KettlePot

Portable Grill

CoffeePress

BioFuel Pellets

Turn Fire Into Electricity

The award-winning BioLite CampStove gets a user-focused upgrade in this latest generation. Featuring a higher power output, integrated battery, and LED dashboard, access improved control and feedback while enjoying BioLite's flagship smokeless combustion. Make wood-fired meals and charge devices all at the same time using only the sticks around you.

Tech Specs

BATTERY
2600 mAh

WEIGHT
2.06 lbs (935 g)

FUEL
Renewable biomass (twigs, sticks, pellets)

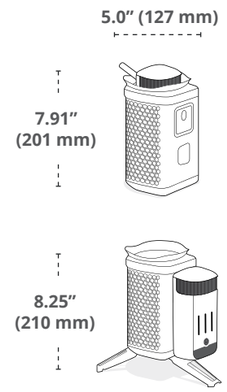

COMPATIBLE DEVICES
Powers most USB-chargeable devices

BOIL TIME
4.5 minutes for 1 L

USB OUTPUT
3 watts

FLEXLIGHT
100 lumens

IN THE BOX
CampStove 2, BioLite FlexLight, Stuff Sack, Firestarter, USB Cord, Instructions

BioLite CookStove

Burn Sticks, Twigs, Pinecones & Pellets

Forget gas canisters and enjoy a smokeless wood fire

Control Flames with Air Flow

Four fan speed settings to control flame size

Compact, Nested Design

Store powerpack in burn chamber to save space

Integrates with BioLite Cooking Accessories

Works with the KettlePot and Portable Grill for all your outdoor cooking needs

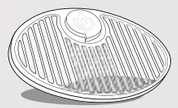

A Fun and Easy Intro to Outdoor Cooking with Wood

Burn wood and create a portable campfire that can cook meals and boil water in minutes. Charge the internal battery for a weekend of smoke-free cooking with easy setup, free fuel, and hyper-efficient flames that perform on par with gas stoves. Add the BioLite KettlePot or Portable Grill to create a fully integrated cooking system.

Boils 1-6 cups of coffee

MATERIALS
BPA-free polypropylene

For Use With

KettlePot

nests inside KettlePot with CampStove, CampStove 2 and CookStove

BioLite
BioFuel Pellets

Go for the long burn with this premium blend of all natural, foodsafe hardwood pellets.

1 Bag = 2 Hours of Cooking
1 bag is the equivalent of two 100 g fuel canisters

Sustainably Sourced
Food safe, premium blend of hardwood pellets

Tech Specs

WEIGHT
2.20 lbs (1000 g)

BURN TIME
2 hours per bag

IN THE BAG
Pellets, firestarter

For Use With

BioLite BaseCamp

5 Watts of Electricity + On-Board Storage

Charge now or later depending on your needs

Grill-to-Boil Functionality

One-touch lever disperses or concentrates flame to transform cooking surface

Large Format Cooking & Refueling

Side fuel entry keeps flames strong and large cooktop fits 8-10 burgers

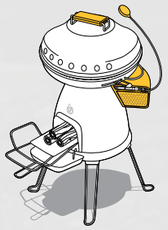

USB Light Included

BioLite USB FlexLight included with every BaseCamp

BaseCamp Accessories

Carry Pack

PizzaDome

pictured with PizzaDome accessory (sold separately)

Complete Cooking and Charging for Groups

The BioLite BaseCamp converts heat into usable electricity to cook up meals and charge devices. Featuring an LED dashboard for real-time feedback and using only fallen branches or small pieces of firewood, it burns smarter than any fire you're used to. A powerful alternative to propane stoves and grills.

Add the PizzaDome, a 3-piece system designed especially for the BaseCamp to cook up pizzas, flatbreads and other wood-fired favorites.

BaseCamp Tech Specs

WEIGHT
17.92 lbs (8.13 kg)

BATTERY
2200 mAh, lithium-ion

IN THE BOX
BaseCamp, BioLite FlexLight, Fuel Rack, Ash Tray, Firestarter, Instructions

USB OUTPUT
5W@5V; powers most USB devices

FUEL
Solid biomass (twigs, firewood, wood chunks)

COOKING AREA
138 in² (890 cm²)

The Most From The Sun in Minimalist Form

BioLite's Solar Series pairs user-centric design with minimalist materials to create a **more powerful charge.** Instead of cumbersome casings and plastics, our proprietary panel-bonding design allows us to feature a **sun-optimizing kickstand and sundial** while maintaining an ultraslim, packable profile.

Charge

Energy On-Demand

Harness the power around you and use it when you want it – that's the belief behind BioLite's charging line of products. Soak up the sun's rays and convert it into stored usable electricity with our Solar+ Series. Keep your everyday gear running with the Charge 10, 20, or 40, a bold new look in durable portable power. High-efficiency meets high-design to bring you energy for life off-grid and on-the-go.

BioLite Charge Series

Powerful charging ready for everyday carry

Waterproof. Durable. Available in three models.

SPRING 2017

IPX7 Rated
Silicone gasket top allows for full submersion

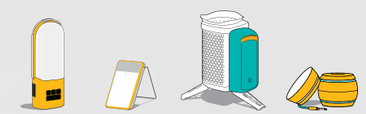

Stainless Steel Housing
Thinner than any plastic while adding overall strength and durability

Pick Your Power
Available in 10, 20, 40 Wh models

Light

Welcome to the NanoGrid

The end of the alkaline and the start of something brighter: this is BioLite Lighting. A modular system of rechargeable lighting, the NanoGrid ecosystem adapts to your needs to bring you efficient light and shareable power ready for any off-grid environment. Featuring BioLite's breakthrough edge-lit technology, our core lights cut out wasted space found in traditional lanterns, providing bright light while saving precious pack volume. Our SiteLights create overhead extended lighting never before seen in the outdoors. From your daily bike ride to a group camping trip, find the right light for the job and discover the power of the personal grid.

BioLite BaseLantern

BioLite BaseLantern XL

500 Lumen Edge-Lit Lantern

Bright and even light in an ultra-packable form

Bluetooth Enabled

Complete lighting control, timer, proximity activation and real-time energy feedback

7800/12000 mAh Battery

Multiple charge-out ports to power phones, tablets, and other gear

SiteLight Ports x2

Part of the NanoGrid, connect multiple SiteLights for overhead string lighting
