Baking, fermentation, defrosting: versatility at its best
Say goodbye to kitchen clutter

The temperature can be adjusted precisely between 40°C and 200°C. The Air Fryer can do more than just air fry your food at high temperatures. It can also ferment, defrost and bake fruits, vegetables and meat.
The Air Fryer integrates the functions of various kitchen appliances such as an oven, fruit dryer, yogurt machine etc.

360° heated air circulation

360° heated air circulation coupled with 1600W heating power enables rapid temperature increase and more balanced heat distribution inside the fryer.
Efficient cooking that squeezes out the fat inside the food, locks in the juice and nutrition, without needing to add oil.
Low-fat, healthy food for your eating pleasure.

Smart Cloud Recipes
Cook like a pro in no time

Access to the Xiaomi Home app for 100+ smart recipes.
