FaceTite Mini

Softens fine lines in difficult-to-reach places

Ideal for use around the eyes, the mouth and between the eyebrows

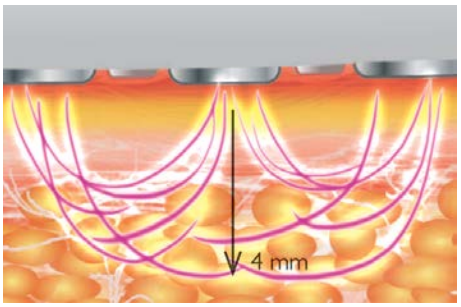

Softens fine lines in difficult-to-reach places
FaceTite Mini with radio frequency and LED light energy is an anti-ageing device for smoother, younger-looking skin. It focuses on fine lines in the smaller areas of the face, such as under the eyes, between the eyebrows and around the mouth. FaceTite Mini reaches deep into the skin and improves the skin from the inside out.

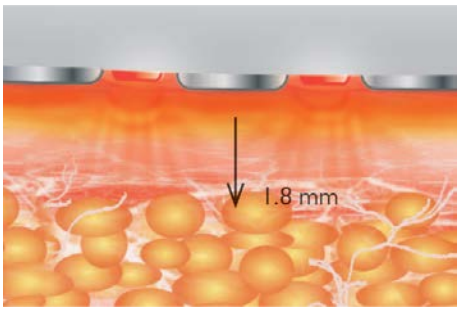

- Softens fine lines in difficult-to-reach places
- Ideal for use around the eyes, the mouth and between the eyebrows
- Reduces the visibility of crow's feet, dark circles, bags and wrinkles around the mouth
- In 4 weeks, an average 24% firmer skin
- Safe for all skin types

Designed for the small areas in the face
The FaceTite Mini is a rejuvenation device, specially designed to tackle smaller areas in the face. The small treatment head enables you to easily treat visible lines between the eyebrows and other signs of ageing such as crow's feet, dark circles, bags, mouth wrinkles, nasolabial lines and tear troughs. Use it 2 or 3 times a week, 3 to 5 minutes per treatment area.

Skin rejuvenation with RF energy and LED light energy
To rejuvenate the skin, Silk'n FaceTite Mini uses two technologies. Bipolar RF (radio frequency) energy and LED light energy. This combination ensures that the collagen and elastin fibres in the skin contract and are reconstructed. It improves blood circulation and repairs the skin from the inside out. With no needles, operations or recovery period.

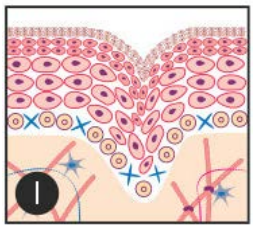

Bi-Polar RF energy
Firms the deeper layers of the skin down to 4mm to lift the facial contours and reduce wrinkles

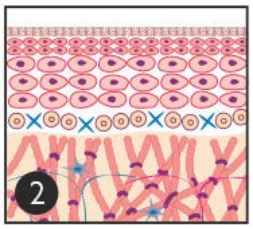

LED light energy
Rejuvenates the skin and restores its natural balance

Amazing results
The effectiveness of the FaceTite Mini has been researched by an independent third party involving 32 patients. After a treatment period of four weeks, the results of a self-assessment questionnaire showed the following:

- 96.9% said they had seen an improvement in the reduction of crow's feet and fewer dark circles
- 93.8% saw a reduction in lines around the corners of the mouth and tear troughs
- 90.6% saw a reduction in puffiness of the eyes
- 100% found the FaceTite Mini to be effective in reducing the visibility of lines and said that their face looked smoother and younger with no adverse side effects

BEFORE:
Damaged and weakened collagen and elastin fibres.

AFTER:
Collagen and elastin fibres contract and the skin repairs itself from within.

Safe
Silk'n FaceTite Mini is suitable for both women and men, on all skin types and skin tones (including darker skin tones). It can safely be used in the difficult-to-access areas of the face, such as next to and under the eyes, between the eyebrows and around the nose and mouth (avoid the eyelids).
There is no recovery period and sunbathing after a treatment is no problem.

Cordless use
The FaceTite Mini can be used cordlessly and lasts 20-30 minutes on a full charge: enough for a complete treatment. The product comes with a USB charging cable.

Specification

Product name	FaceTite Mini
Treatment areas	face
Technology	HT™ Technology: Bi-Polar Radio Frequency (RF) Energy, LED Light Energy
Number of levels	4
Power supply	battery
Rechargeable	Yes
Cordless	Yes
Usable while charging	Yes
Package content	1x FaceTite Mini Gerät 1x Slider Hyaluronic Gel 1x USB cable 1x user manual
EAN	8712856068944
